

## Civil Engineer (Mid-Senior Level)

Gandy and Roberts Consulting Engineers provides quality innovative and cost-effective civil engineering services for commercial, institutional and domestic building projects throughout Tasmania.

Gandy and Roberts is linking traditional and proven engineering concepts with innovative technologies to meet the demands of builders, architects and designers in today's very competitive building industry. We work hard to maintain a healthy, positive attitude to our work, and to ensure that all of our staff continue to develop and reach their career goals.

---

We have a permanent full-time position available for an experienced Civil Engineer in Hobart – one of Australia's most liveable cities and surrounds. The position involves undertaking or assisting with the design, documentation and site supervision of a range of developments including:

- Civil design for building projects (Building pads, driveways, car parks, bulk earthworks, drainage)
- Subdivisions
- Roadworks and hydraulic infrastructure
- Flood Studies
- WSUD

Applying relevant civil design concepts using 12D software confidently and independently is a prerequisite to be successful in this role. You will have at least 5 years work experience in a civil design role and hold a civil engineering degree.

Attractive remuneration commensurate with level of experience will be negotiated with the successful applicant. Due to COVID-19 travel restrictions, only applicants with Australian citizenship or visa holders currently residing in Australia will be considered.
